01 PROFILE

Eight years across three seats — **design, operations and marketing management** — for consumer and agricultural brands. I cover the visible side (identity, packaging, OOH), the moving side (process, budget, multi-channel, reporting), and more recently the underlying frame: **data system design, report automation and building internal app/web tools**. Knowing all three sides is why my campaigns don't break at handover.

02 EXPERIENCE

2018 — present

2023 — NOW Head of Marketing & Communications

CFC · Fertiliser (Cò Bay) & household care (PANO, Oplus, ZeO)

- **Own marketing and communications end to end** for both categories: annual and quarterly planning, budget allocation, leading the design, content and channel teams.
- **Run multi-channel commerce** across TikTok Shop, Shopee and Facebook: content planning, photo/video production, sales tracking and data-led optimisation.
- **Run Shopee Ads and Meta Ads hands-on** — 8.41x ROAS and 274.6M ₫ of ad-driven GMV in the latest quarter (dashboard on page 3).
- Established a **weekly reporting rhythm on the 4DX framework** (WIG – lead measures – scoreboard), turning sales and content data into weekly course corrections.
- Standardised identity at both corporate and product-line level, keeping every asset, pack and billboard consistent.

2021 — 2023 Head of Operations

CFC · Process – schedule – cross-department coordination

- Ran operations across the three fronts of **production, sales and marketing**: process, schedule and resource priority.
- **Built and standardised the workflow** request → design → approval → print → delivery, cutting waiting time and production errors.
- Managed suppliers and printing partners (specifications, quality, norms, cost control) and tracked team performance with metrics rather than gut feel.

2018 — 2020 Deputy Design Manager

CFC · Art direction & brand design

- Art direction and hands-on design: **brand identity, packaging and labels, large-format billboards, seasonal key visuals**.
- Built guidelines and templates so a larger team could still produce work in one visual voice.
- Owned pre-press (specifications, colour, proofs, direct work with printers), product photography and retouching, plus 3D and motion work for advertising.

CORE CAPABILITIES

Design & Art Direction

Brand identity · Guidelines · Packaging & labels · Pre-press & specs · OOH / Billboard · Key visuals · 3D render & motion · Photography & retouching

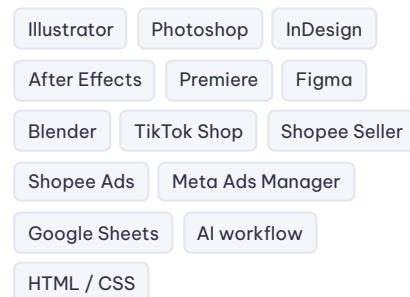

Operations & Management

Process & SOP · Team leadership · Suppliers & printers · Planning & budgeting · Multi-track project management · Shopee & Meta ads · Weekly 4DX reporting

Systems & Digital Products

Data system design · Report automation · Internal app / web product thinking · Prototyping & interface · Applying AI to workflows

TOOLS

CATEGORIES

Fertiliser & agricultural inputs · Household care (homecare) · FMCG · E-commerce

PANO – Identity system & brand book**BRAND DESIGN LEAD**

Logo, colour palette, typography and application rules; the brand book became the shared standard for every asset produced afterwards, by anyone.

Cò Bay – Packaging & seasonal key visuals**ART DIRECTION · PACKAGING**

A fertiliser label system for rice, coffee, durian and the biochar line; each message tied to a specific stage of the farmer's crop cycle.

OOH library 2024 – 2026**LARGE-FORMAT LAYOUT · RETOUCH**

Billboards and panels for both categories: layouts that read at distance and speed, placing the product inside a real landscape.

CFC – Corporate identity**DESIGN & STANDARDISATION**

Logo built on a construction grid, with an application system spanning office, product and communications – the company-level identity foundation.

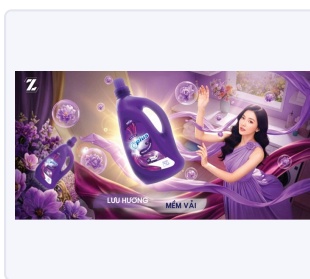

Homecare – Oplus · ZeO · PANO**PACKAGING SYSTEM**

Bottles, pouches and canisters across many volume, scent and colour variants – one system on the shelf, correct to print specification.

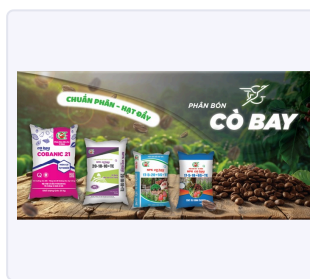

Internal reporting system & digital products**SYSTEM DESIGN · SELF-BUILT**

Turned TikTok Shop / Shopee / Facebook data into an automated weekly reporting pack; designed, built and deployed an interactive web portfolio on Vercel.

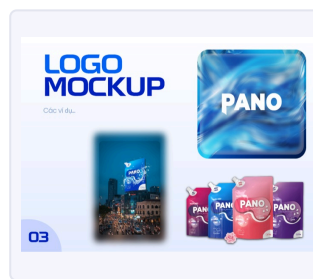

04 PORTFOLIO EXCERPT

truongphan-portfolio-interface.vercel.app

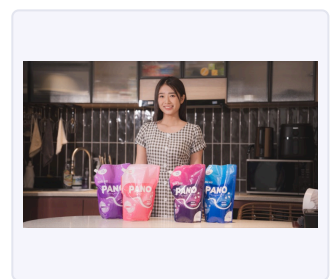

BILLBOARD · OPLUS 2IN1

SEASONAL OOH · CÒ BAY

IDENTITY · PANO

PRODUCT PHOTOGRAPHY

05 HOW I WORK

01

A design has to survive where it **actually lives** – on the shelf, out in the field, or on a five-inch screen. Looking good on the designer's monitor is not enough.

02

A good process outlasts a single **beautiful design**. I build systems so quality never depends on one person being available.

03

What gets measured gets **fixed**. Every campaign has a reporting rhythm and a checkpoint to adjust, instead of waiting until the period closes.

06 ADDITIONAL

LANGUAGES

Vietnamese – native

English – professional reading comprehension

ROLES I FIT

Marketing Manager · Brand Manager · Head of Marketing & Design · Creative Operations

LOCATION

Can Tho & the Mekong Delta · Ho Chi Minh City · open to remote

If you're looking for someone who can shape the idea, carry it through to the finished product – and keep the system running afterwards – **let's talk.**

Advertising performance dashboard

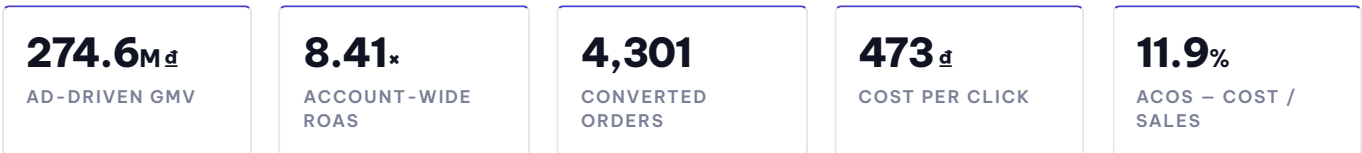

Figures pulled straight from the Shopee Ads report and the Meta Marketing API – nothing rounded up, all verifiable inside the accounts.

Data sources

Shopee Ads · CFC – Household Care
Meta Ads · CFC Social business
Pulled 28 Sep 2026

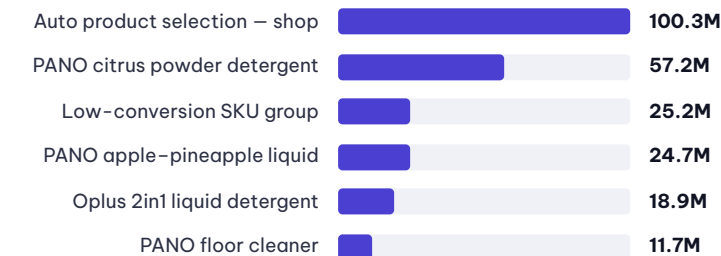

07 MARKETPLACE ADS – SHOPEE ADS

28 Jun – 28 Sep 2026 · 32 campaigns

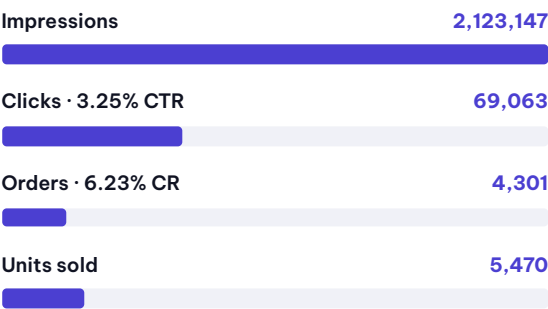

08 LEADING CAMPAIGNS & CONVERSION FUNNEL

TOP CAMPAIGNS BY SALES

Unit: million of sales. The leading campaign returned 10.46x ROAS on 1,479 orders; these six campaigns account for 87% of the store's total ad-driven sales.

THREE-MONTH FUNNEL

Bars are scaled relative to each other to show funnel drop-off. Ad cost of 32.6M produced 274.6M in sales – an average of 7,589 spent per order.

09 SOCIAL ADS – META ADS

05/2024 – 07/2026 · 3 accounts

Operating scale

1.03M IMPRESSIONS

13,674 clicks, 1.33% blended CTR and 1,085 in CPC on a 14.8M budget – across five objective families and two product categories.

PANO Christmas event

5.55% CTR · 927 CLICKS

A seasonal engagement campaign that ran 4.2x above the account average CTR on a 1.35M budget.

Traffic to the Shopee store

3,134 CLICKS · 908 in CPC

The BiO 14-day campaign pushed Facebook traffic into Shopee, reaching 118,534 people – both channels wired into one funnel.

10 HOW I OPTIMISE

01

Group SKUs by conversion state. Low-converting, not-yet-converting and budget-starved products each get their own campaign and bidding approach, instead of spreading spend evenly.

02

Run two bidding layers. One shop-level automated campaign as the base – currently carrying 100.3M in sales – plus custom-ROAS campaigns at product level to protect the efficiency margin.

03

Wire both channels into one funnel. Facebook is measured at the top by CTR and CPC, Shopee at the bottom by ROAS and orders; the whole thing is reviewed on the weekly 4DX rhythm.

Data note. Shopee Ads: the store's CPC display-advertising report (CFC – Household Care), 28 Jun – 28 Sep 2026, 32 campaigns (13 live) – 274,617,887 in sales on 32,639,322 in spend. Meta Ads: pulled via the Marketing API on 28 Sep 2026 from the 3 accounts with recorded spend in the CFC Social business. Ad-driven sales are GMV as recorded by Shopee, not profit.
